Leading Manufacturer of
**SEAMLESS ROLLED
RINGS & FORGINGS IN
ALL ALLOY AND
NON ALLOY STEEL**

ABOUT COMPANY

At Orbin Forge, we combine advanced manufacturing expertise, precision engineering, and strict quality standards to deliver industrial flange solutions trusted across diverse industries.

Based in Gondal, Rajkot, Gujarat, Orbin Forge specializes in manufacturing high-quality industrial flanges designed for strength, durability, and reliable performance. Our commitment to precision manufacturing, quality assurance, and customer satisfaction enables us to serve industries such as oil & gas, Defence, Aerospace, Auto Parts and heavy engineering with confidence.

OUR VISION

To become a globally recognized and trusted manufacturer of industrial flanges by delivering excellence in quality, innovation, precision engineering, and customer satisfaction.

OUR MISSION

To manufacture premium-quality flange solutions that meet international standards while delivering reliability, performance, and value to our customers across diverse industries.

TRUSTED FLANGE MANUFACTURER

COMPANY INFRASTRUCTURE

At Orbin Forge, our infrastructure is built to support precision manufacturing, stringent quality standards, and efficient production processes. Equipped with modern machinery, advanced inspection systems, and streamlined operations, we ensure consistent quality and timely delivery for projects across diverse industries.

In House Die Shop

Ring Rolling Machines

Automatic CNC
Machine Shop

Automatic Drilling Machines

Stamping Machines

Automatic Paint Line

OUR FACILITIES

-  MPM HAMMER 3.5 TON
-  PRESS 400 TON
-  RING ROLLING UPTO 1000 MM OD
-  CNC Machine Shop
-  Automatic Paint Line
-  Automatic Multi Spindle Drilling Machines
-  Automatic Stamping Machines
-  Physical Lab
-  Automatic Band Saw Cutting Up To 400 mm square
-  Die shop - Die designing and Tool room
-  Component Design Department with CAD/CAM facilities

OUR PROCESS

Our advanced manufacturing process ensures precision, quality, and reliability at every stage — from raw material to final delivery.

01. MATERIAL PREPARATION

High-quality raw materials are carefully selected, inspected, and prepared to ensure consistent mechanical properties and superior product performance.

02. HEATING & FORGING

Materials are heated under controlled conditions and forged using advanced equipment to achieve the required shape, strength, and structural integrity. This process enhances grain flow and improves mechanical properties.

03. SEAMLESS ROLLED RING MANUFACTURING

We produce seamless rolled rings with diameters from 300mm to 3000mm and heights up to 600mm, which is ideal for heavy-duty industrial applications. Custom profiles are available upon request.

04. PRECISION MACHINING

Modern machining equipment ensures dimensional accuracy, tight tolerances, and superior surface finishes according to customer specifications and international standards.

05. INSPECTION & TESTING

Every product is subjected to comprehensive quality checks, dimensional inspections, and testing procedures to ensure compliance with industry requirements and performance expectations.

06. PACKAGING & DELIVERY

Finished products are securely marked, packed, and prepared for safe transportation, ensuring timely delivery to customers across domestic and international markets.

INDUSTRIAL FLANGE SOLUTIONS

Manufacturing high-quality industrial flanges designed for strength, durability, and reliable performance across critical industrial applications.
